LCD colour screen

LED light

SPECIFICATION

Up to a 30 mega-pixel high definition clear colour LCD screen provides vivid images of the larynx and glottis.

A cross-hair display on the screen supports accurate and reliable intubation.

This waterproof model can be used outdoors even in wet conditions.

The Pentax Airway Scope (AWS-S200) weighs just 235g making it the lightest model yet.

Benefiting from low power consumption and designed for up to 1 hour continuous use on AA batteries.

FEATURES

The target symbol on the monitor facilitates safer intubation, even for less experienced users.

Connect to medical monitors or video recording devices to simultaneously show footage from the scope on a larger monitor or to record.

With the variety of PBLADE family, securing the airway through tracheal intubation and suction of the oral cavity can be performed smoothly without tracheal damage.

PENTAX AIRWAY SCOPE

Product Code	Description
6000.100.00	Pentax Airway Scope

Equipped with a tube channel so no stylett (guide wire) required.

Sterile and single use to reduce the risk of cross infection.

The tube channel allows easy intubation even after insertion of a tube into the oral cavity.

Compatible with tracheal tubes of an outer diameter of 8.5mm to 11.

Hole to accommodate suction catheters 4.0mm (12F) or less for suction of the oral cavity.
